PROJECTS

AI Image Generator | *Reactjs,Html,Css,API*　　　　　　　　　　　Aug 2024 – Nov 2024

- This project involves the development of an AI Image Generation web application using React.js and Generative AI models for text-to-image generation.
- This platform allows users to input descriptive text prompts, leveraging Generative AI to generate corresponding images.
- By utilizing React.js, the application provides a dynamic, responsive, and user-friendly interface that enhances the user experience with real-time text processing and image rendering.
- Git Hub link: https://github.com/Adityakoda/illustra

Responsive Multipage Educational Website | *Html,Css,JavaScript*　　April 2024 – july 2024

- Developed a fully responsive, multipage website tailored for educational purposes.
- The site was designed to provide an intuitive and engaging user experience across various devices, ensuring accessibility and usability for students, educators, and administrators.
- It is Designed using html, css and javascript
- Git Hub - https://github.com/Adityakoda/Online-education-website
